2xAV.org provides an exciting and flexible new way to navigate

Web pages using the mouse/keyboard instead of the "page up/down" mechanism of the conventional "browser". The 2xAV.org Web site is an interactive program/documentation/scripting toolkit that works with all major Web browsers including Internet Explorer, Netscape Navigator, Opera, Mozilla, and Safari. 2xAV.org does not depend on any software you don't have, such as java, or ActiveX controls. To make it easier to navigate pages, you can start right away with a single click of the mouse to display a synopsis or summary of the page.

Use the button to quickly access other sections of the page, or jump to any part of the page, including the tables and images. Once you're there, scroll around the page using the new "page up/down" mechanism, or get more information using the jump buttons. Different sections of the page can be bookmark and stored in the 2xAV.org. 2xAV.org is not just for Web sites, it works with other file types, too, such as printer documents, word processors, and presentation programs, allowing you to easily navigate and view them.

2xAV.org Features: □ Quick page

synopsis □ Jump directly to page section from synopsis □ Jump directly to page b7e8fdf5c8

2xAV Plugin For Windows Media Player With Registration Code Free Download

The Enounce 2xAV plug-in adds a "slider bar" to the WMP that lets you change the playback rate of Video and Audio from 1/3 to 2.5 normal speed without pausing playback. Patented Signal Processing keeps audio sounding natural (not "chipmunked") at all speeds; and allows users to comprehend and remember the information. Adds VCR-style Fast-forwarding and slow-motion playback, but processes the audio to maintain natural sounding speech. Use it to speed through boring material, slow down for

interesting portions. Watch or listen to news, movies, analyst calls, financial commentary, and sports at twice normal speed and understand all of the information. Great for on-line training, getting information fast and skimming to the end of a file without "skipping over material". You get it all, at your own rate. Here are some key features of "2xAV Plugin for Windows Media Player": □ Lets users play video and audio material at any speed between 1/.5 normal speed with natural sounding audio □ Fast-forward and slow-motion slider allows you to SKIM boring stuff; and SLOW-

DOWN for interesting material □ Change speed during playback without pausing or stopping □ Works with local files and files streamed from the internet (any file format supported by WMP) □ See twice the material in the same amount of time and comprehend everything said □ Watch the World's Internet Media at YOUR Speed! □ Works with WMP embedded in web pages □ Embed the 2xAV speed bar in your own pages with the □ new ActiveX Control □ Customize the interface with the programmable ActiveX Control (requires API License) □ Smaller size,

downloads in half the time

Limitations: □ 7 days trial 2xAV Plugin for Windows Media Player
